2006 RESEARCH UNDERGRADS

SFI is hosting six US undergraduate interns and two international undergrads as part of our ten-week summer residential program. They are:

Peter Gross, studying math and economics at the University of Arizona; **Jenny Guth** from Smith, interested in dynamical systems; **Stephen Meisburger** comes from Carleton College with the background in CA's and robotics; **Alex Mueller** from Washington University wants to study "persistent inequalities"; **Clara Orbe** from Brown, past member of Carlos Chavez' Mathematical and Theoretical Biology Institute (MTBI), interested in math modeling; and **Amory Schlender** from Reed, studying dynamics of learning.

Our two international students are: **Carja Oana** from Cuza University in Romania, She will be working with **Tanmoy Bhattacharya** and **Bette Korber**; and **Chao Pang** from Peking University; he will likely be working with **Chen Hou**.

For most of the first week the REU's will be attending morning sessions of the CSSS and spending afternoons at SFI determining their projects and mentors.

JULY PUBLIC LECTURE

The Santa Fe Institute will present a Public Lecture on Wednesday, **July 12, 2006**, at 7:30 pm at the James A. Little Theater.

The lecture, entitled "The Mother of Mass Extinctions: How Life on Earth Nearly Ended 250 Million Years Ago," will be presented by **Douglas Erwin**, Senior Scientist, National Museum of Natural History, Smithsonian Institution and Professor, Santa Fe Institute, with **David Krakauer**, Professor, Santa Fe Institute.

During the greatest biodiversity crisis in the history of life some 250 million years ago, over 90% of all the species in the oceans died off in just a few hundred thousand years. Douglas Erwin, author of the new book *Extinction: How Life on Earth Nearly Ended 250 Million Years Ago* discusses his research in China, South Africa, and the western US in search of the causes and consequences of this great extinction.
